LIVE
Surgery

COURSE DESCRIPTION

With the extensive use of LIVE PATIENTS and hands-on learning, the focus of the program is to teach dentists the surgical and prosthetic components of implant dentistry. In addition to learning the basics of implant dentistry, doctors will also learn about treatment plans and how to apply these plans to different situations. In order to better serve participants, we limit the course participation to 5 doctors and include all necessary materials and disposables.

COURSE OBJECTIVE

By the end of the course, clinicians will be able to:

- Gain a thorough understanding of the principles and protocols of implant treatment.
- Develop the ability to diagnose, plan, and execute implant cases with confidence.
- Enhance surgical skills through hands-on surgical training with live patients.
- Learn to manage complications & ensure long-term success of implant treatment.
- Stay updated with the latest advancements and technologies in implant dentistry
