

ROADMAP TO OPTIMAL FULL ARCH IMPLANT PROSTHETICS

2024
SEPTEMBER

SATURDAY
7

Dr. Caleb Kim

MEGAGEN AMERICA / MINEC

39-40 BROADWAY
FAIRLAWN, NJ 07410

This seminar provides dental professionals with fundamental and important clinical knowledge discussing key principles on how to diagnose, plan, and execute a full-arch implant treatment. Join us for this interesting full-day CE course presented by Dr. Caleb Kim that will highlight predictable protocols for optimal full-arch implant prosthetic treatment outcomes for your patients.

Learning Objectives:

- Review a history of full-arch implant treatment
- Understand key principles for the success of full-arch implant treatment
- Understand the key steps in full-arch implant treatment planning:
 - Diagnosis and case selection
 - Communication with patients
 - Surgical planning with CBCT and digital/conventional impressions
- Understand the clinical steps involved in full-arch surgical implants placement with immediate loading
- Understand the clinical steps to fabricate and insert final full-arch implants-supported prostheses
- Understand maintenance protocols and management of complications
- Hands-On Exercise includes:
 - Guided placements of 4 implants on a model
 - Conversion of a denture to an implants-supported provisional bridge
