

# IMMEDIATE DENTAL IMPLANTS IN THE POSTERIOR

2024  
NOV

SUN  
24

**Martin Leybovich DDS, MSD**

**MEGAGEN AMERICA / MINEC**

39-40 BROADWAY  
FAIRLAWN, NJ 07410

This course provides an overview of posterior oral anatomy, focusing on the maxilla and mandible. It examines immediate and delayed implant placement, discussing the advantages and disadvantages, such as implant burial, temporization, and the use of guided or freehand techniques.

## Course Overview

1. Review Anatomy of the posterior regions of the mouth
  - a. Maxilla - Maxillary Sinus, Maxillary Artery, Socket Anatomy
  - b. Mandible - Inferior Alveolar Nerve, Mental Nerve, Anterior Loop, Socket Anatomy
2. Immediate Implant planning - Immediate vs. Delayed implant placement
  - a. Advantageous vs. Disadvantageous
  - b. Bury the implant or not
  - c. Temporization or no temporization
  - d. Guided vs. Free Hand approach
3. Implant Placement
  - a. Socket Anatomy During Placement
  - b. Bone Expansion vs. No-Expansion
  - c. Internal Sinus Lift
  - d. Lateral Window Sinus Lift
  - e. Size of Implant

## Attendees should be able to

- Recognize when a posterior immediate implant can be placed
- Decide during planning stage whether a Guided Surgery would be necessary or a free hand approach would suffice
- Understand the anatomy and techniques involved to place a posterior immediate
- Understand how to choose the correct implant size based on anatomy
- Understand if any adjunctive procedures are necessary with implant placement - for example, sinus grafting or temporization

## ABOUT THE PRESENTER

**Martin Leybovich DDS, MD**

Dr. Martin Leybovich practices a very welcoming periodontal and dental implant practice in Pikesville, MD. After completing his periodontal and dental implant training, Dr. Leybovich started his periodontal and dental implant practice, the Maryland Center for Periodontics and Dental Implants. Dr. Leybovich's practice primarily focuses on implant therapy as part of one's comprehensive treatment plan. This includes, extraction and site development for future implants, immediate implants, and immediate temporization. Over the years, Dr. Leybovich has transitioned his practice into a perio-implant-prosthetics practice, whereby immediate temporization over implants plays a substantial role.

Over the years, Dr. Leybovich has lectured on different topics on dental implants and periodontal treatment at some highly regarded dental meetings locally. Dr. Leybovich is consistently up-to-date with the latest technological advances in both dental implant placement and periodontal disease treatment. Dr. Leybovich is a member of the American Academy of Periodontology and American Board of Periodontology.

## COURSE DETAILS

### Lecture & Workshop

Credit Hours: 4 CEU

AGD Code: 690 Implants
