Hands-on Training for Seamless Integration of a 3D Printing Workflow into Your Practice

Muriel Deutsch | Arian Deutsch

Aug 09 SAT

MINEC America
Irving, TX

This course is designed to equip dental professionals with the practical skills needed to enhance their implantology workflows and improve patient care through advanced digital solutions. Participants will gain a deep understanding of the preparation process, surgical workflow, and prosthetic fabrication from the moment a patient visits the clinic. Through hands-on training, attendees will plan cases ranging from simple to complex. The course also includes utilizing R2GATE's QVD feature, integrating facial scan data, and exploring the prosthetic fabrication process.

Learning Objectives:

- Learn proper techniques of intraoral scanners(IOS) for implant planning
- Learn proper techniques for acquiring CBCT scans and facial scan data
- Understand the preparation process for surgeries using surgical guide stents
- Gain insights into surgical consideration when using surgical guides stents
- Hands-on practice in planning cases using R2GATE, from single implants to All-on-X cases
- Learn how to plan implants using the patient's existing prosthetics (e.g. dentures)
- Understand the prosthetic fabrication process after All-on-X planning using multi-unit abutments
- Explore patient consultation techniques using facial scan data with R2GATE QVD
- Learn how to fabricate prosthetics using 3D printing
- Understand the process of printing surgical guides stents with a 3D printer
