

# LEVEL UP YOUR PRACTICE

## Continuum 1

This 22-hour surgical extraction course combines 8 hours of self-paced online instruction with 2 days of hands-on simulation. Make your incisions, flaps, sectioning, and instrument use more efficient while understanding force dynamics and how to avoid common complications.

This is more than a weekend extraction course—it's a transformative experience that will elevate your practice.

"We [My Community Dental Centers] have sent about 25 of our doctors through [KCSI Continuum 1]. Without exception, our doctors tell us how much the course has helped them in their daily clinical surgery practice. If I were starting out in practice, the first course I would take would be this one."
