

## Dr. Ben Ross, DMD, FACP

Dr. Ross is from Charlottesville, Virginia, and is a board-certified prosthodontist and a Fellow in the American College of Prosthodontists. He holds memberships in the Academy of Osseointegration, the American Dental Association, the Virginia Dental Association, and the Shenandoah Valley Dental Association. He completed his prosthodontics residency through the US Army and was stationed at Walter Reed Army Medical Center in Washington, DC, and at Fort Belvoir, VA, where he instituted computer-aided surgical implant guides for wounded warriors and service members.

He was deployed to Iraq in support of Operation Enduring Freedom from 2010-2011. He continues to serve his country as a Colonel in the US Army Reserves, where he is currently a student at the Army War College Distance Education Program. Dr. Ross enjoys spending time with his wife and four teenage children, traveling, and keeping up with the latest developments in dental implant prosthodontics.

**Jesse & Frichtel Dental Labs**  
1861 Golden Mile Hwy  
Pittsburgh, PA 15239

### Learning Objectives:

1. Define the benefits and advantages of dental implants in multiple phases of dentistry
2. Identify non-conventional treatment planning options with and without dental implants
3. Illustrate clinical and laboratory techniques for fixed and removable restorations with and without dental implants
4. Practice how to better communicate with your partner dental laboratory

**Mega'Gen America**

# Implant and Prosthetic Treatment Planning

Singles, bridges to full-arch—when, where, and why!

Analog plus digital and telescopic solutions.

This program is aimed at helping clinicians by discussing treatment planning and decision-making processes, from replacing the single anterior missing tooth to the fully edentulous arch and beyond. We will discuss how digital dentistry has impacted these processes and how you can leverage it to benefit your patients and your bottom line. Some of the topics we will discuss and questions we will debate are:

- What are some of the determinants for keeping bone around implants?
- When implants are not the chosen solution, what are some alternatives?
- Do all patients need “anchored teeth,” or will some fare better with removable and telescopic alternatives?
- When should cantilevers be used on implants? Are they the same as teeth?
- How to balance patient preferences with clinical factors and financial realities? Is digital dentistry the answer?

## General Information

February 3, 2023

850 Cranberry Woods Dr.  
Cranberry Twp, PA 16066  
Great Room A

**Registration:** 7:30 a.m. - 8:00 a.m.

**Presentation:** 8:00 a.m. - 3:30 p.m.

**Continental Breakfast and Lunch Buffet Provided**

**Credits:** 6 CE credits will be provided

**Audience:** GP/Prosth, OMS, Perio

**Subject Code:** 690

**SAC:** Straightforward/Advanced

**Type:** Lecture
