

UNIVERSITY IMPLANT EDUCATORS

Power up your skills By performing procedures under the supervision of our qualified faculty. You will plan and perform treatment on pre-screened patients (rather than on plastic models or on pig jaws) according to your experience and level of training. Regardless of your skill level, this course will expand your comfort zone, enabling you to incorporate new and valuable techniques into your practice. This course emphasizes real world execution from implant placement, alveolar ridge expansion, crestal and lateral wall sinus graft augmentation.

Course Presenter

Francis Jones, DDS

William Meza, DDS

Jordan D. Colby, DMD

Irina Ganzha, DDS

Sohail M. Ebrahimi, DDS

Alen Bakhtamian, DMD

Sassan Dadseresht, DDS

TESTIMONIAL

"I Loved the Course. I placed 10 Implants my first day and feel confident I can go back to my practice and begin placing implants as part of my treatment plan"

Dr. Thomas F. Lee

TESTIMONIAL

"This is the best Course I have ever taken. I performed three sinus lifts and two ridge splits. Wow! but most all I was able to help patients at the free dental clinic"

Dr. Ruben Acosta

TESTIMONIAL

"When I signed up for the course I did not know what to expect. It was a great investment! I learned so much I recommend the course to anybody who wants to learn how to place dental implants"

Dr. Patrick A. Miller

Live Surgery Course All Performed by YOU on Live Patients:

*Sinus Lift Surgery * Advanced Bone Graft Techniques * Ridge Split Techniques * Implant Placement
Piezo Surgery * Treatment Planning Cases * CGF Membrane, and Sticky Bone*

This intensive 4 day Live Surgery is limited to eight clinicians and gives you the opportunity to practice innovative approaches to bone regeneration, tissue engineering, sinus lift techniques, implant placement, and other surgical procedures. Patients are pre-selected with various levels of surgical complexity and matches to your clinical skills. All surgeries are performed at the free dental clinic. All participants receive temporary work permits from Mexican Department of Health. Participants place between 15 to 35 implants depending on complexity of cases.

Who should take this course?

Doctors beginning to place implants or those who wish improve surgical skills and learn advanced techniques utilized in implant placement and grafting.

What will you learn?

- Implant Placement Techniques
- Piezo-electric Surgery Technique
- Centrifuge Techniques for Fibrin Membrane Preparation
- Harvesting Technique of Growth Factors
- Ridge Split Techniques with Implant Placement
- Socket Grafts
- Sinus Elevation Techniques:
 - ✓ Lateral Window
 - ✓ Crestal Membrane Elevation
- Membrane Repair Techniques
- Flap Design and Suturing Techniques
